## Ministry of Environment of the Republic of Korea

designates HIMACS as environmentally-friendly thanks to the demonstration of its commitment to ecological awareness in its product management activities.

## M1 Emissions Classification

The Finnish M1 classification presents emission requirements for building materials used in office and residential buildings with respect to good indoor air quality.

## Leadership in Energy and Environmental Design (LEED)

Is a standard voluntary system to certify high performance of buildings, from the US Green Building Council (USGBC). LEED certifies buildings using a credit system. The use of HIMACS contributes toward satisfying EQ Credit for Low-Emitting Materials with the category Indoor Environmental Quality (EQ).

## ISO 14001

The ISO 14000 family concerns the management of environmental quality. The most popular certificate in this group is ISO 14001. It encourages the minimisation of damage caused by our own activity to the environment and the continuous improvement of environmental performance. The objective is to contribute to protecting and stabilising our planet's environment. This test certifies that the environment management system of HIMACS conforms to ISO 14001 standards.

## Greenguard

HI-MACS® has been approved by Greenguard in the USA, as a "low emitting product". The organisation establishes acceptable indoor air standards for indoor products, environments and buildings. The organisation's goal is to improve public health and quality of life through programs that improve indoor air.

## Environmental Building Certificate - Grade "outstanding"

The Korean Air Cleaning Association certifies that HIMACS complies with the Korean regulations for environmental building materials.
